

PROVISIONAL APPLICATION FOR PATENT COVER SHEET

(37 C.F.R. § 1.53(c))

1. TITLE OF THE INVENTION:

SYSTEM AND METHOD FOR TEMPORAL COGNITIVE NAVIGATION AND DECISION DRIFT PREVENTION (THE ORNS MATRIX)

2. INVENTOR(S):

Inventor 1:

Name: Matthew J. Campbell

Residence: [City, State]

Citizenship: United States

3. CORRESPONDENCE ADDRESS:

Matthew J. Campbell

[City, State, Zip Code]

Email: [Insert your Email Here]

Phone: [Insert your Phone Number Here]

4. U.S. GOVERNMENT AGENCY INTEREST:

☐ Yes

☒ No

5. ENTITY STATUS:

☒ Micro Entity (Gross Income Limit + <4 Previous Applications)

Applicant certifies that they qualify for Micro Entity Status under 37 CFR 1.29.

6. ABSTRACT OF THE DISCLOSURE:

A software-implemented interface and method for mitigating cognitive decision fatigue and "drift." The system presents a radial user interface (The Matrix) divided into functional quadrants (Execute, Delegate, Archive, Delete). A strict temporal constraint (e.g., 3.0 seconds) is enforced via a visual countdown timer. Failure to categorize an input within the time limit triggers a "Lockout State," visually penalizing the user to reinforce high-velocity cognitive processing. The system includes an ambient audio monitoring mode to detect social entropy (silence) and trigger haptic feedback prompts.

7. WARNING:

This provisional application provides a filing date for the invention described herein. It does not become a patent. A non-provisional application claiming the benefit of this provisional application must be filed within 12 months.
